Allowable Subject Matter

1. Claims 1-38 are pending. Claims 1-38 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of Barker et al. (U. S. Patent 6,233,252) teaches transferring very large data files to a remote location. The very large data files are fragmented into small ordered blocks and are transmitted to the remote location using a data distribution system. At each remote location, the ordered fragmented files or blocks are reassembled in accordance with the original ordering scheme.

In regarding to independent claims 1, 24 and 38, Barker taken either individually or in combination with other prior art of record fails to teach or suggest the recipient notifying a recipient of the electronic document folder with an indirect reference, and selecting a destination server from the plurality of servers based on the data provided by said recipient when said recipient wishes to retrieve the electronic document folders. Furthermore, wherein the recipient and the destination server are separate entities as indicated by the applicant whereas the recipient and the destination server in Barker's teaching are one single entity.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
